What is Elaptacoin?

Elaptacoin is a novel cryptocurrency project utilizing Python and Flask, combining Proof of Space and Proof of Work consensus mechanisms. Elaptacoin offers PoS (Proof-of-Space) mining, similar to Chia, utilizing space on any form of digital data storage, and PoW (Proof-of-Work) via CPU.

Technical specifications

Ticker: ELAP
Blockchain: Centralized
Supply: 1 million
Transactions Velocity: Instant
Rewards: Variable rewards
Algorithms: SHA256 (PoW) , SHAKE128 (PoS)
Supported devices: CPU (PoW), 3.8GB+ Data Drives (PoS)
